Roses for 2011

Our rose list will help you select roses for any desired characteristic: color, fragrance, cutting to enjoy in arrangements, as a hedge, or to grow in a large pot. We have also have roses that will grow in partial shade, and those that are nearly thornless so they can be planted near where children play, or entrances.

Our roses are planted in 3 gallon biodegradable paper pots, containing rose soil, fertilizer and Root Activator. Their canes are pruned to their proper height, ensuring that each bush attains its maximum blooming potential. The biodegradable paper pots should be planted directly in the ground, where they will decompose.

For complete growing information and pictures of the roses in this list, please visit our website: www.rcwnurseries.com. For up-to-date availability about any listed rose, please call us at 281-440-5161!

These roses do not need special attention once they are established. Just give them plenty of sun, room to grow, water, and organic fertilizer. They aren't troubled by disease or insect pests; and hate being sprayed with any synthetic pesticide. Flowering slows down during the height of a Houston summer, and resumes in full force when it cools down.

Earth Kind Rose means the shrub has been thoroughly tested by Texas A&M's AgriLIFE Extension service. It is recognized as an environmentally friendly plant for Texas gardens with its outstanding landscape performance and superior pest tolerance. See earthkindroses.tamu.edu for more info.

Price	Name	Class	RIR Score	Comments
19.99	Archduke Charles	Ch	8.5	Prior to 1837. Flowers open with crimson outer petals and pink centers that darken to solid red. Heat speeds the process: a bi-color hedge in spring will be all red roses by mid-summer. Returns to bi-color in fall. Neat, 3- to 5-foot bush is always in bloom.
24.99	Belinda's Dream	S	8.5	1987. Earth Kind Rose. Texas Superstar Plant. Great choice for a novice rose grower. Thornless. Richly scented, large pink flowers. Makes a wonderful hedge or specimen plant. 45+ petals.
19.99	Blanc Double de Coubert	HR	8.6	1892. Tough, rugosa with a continuous production of pure white flowers. Beautiful shrub. Strong licorice scent. Tolerates partial shade.
19.99	Carefree Beauty	S	8.6	1977. Earth Kind Rose. Formerly Katy Road Pink. Great choice for a novice rose grower. Fragrant & very floriferous with very long new buds all season on a graceful 3 to 5-foot bush. Semi double vivid pink flowers with showy stamens. 15 – 20 petals.
19.99	Cécile Brünner	Pol	8.4	1881. Perfectly shaped, little pink buds give it its nickname, 'The Sweetheart Rose'. Remains compact, putting up sprays of tiny, high-centered flowers that resemble hybrid teas. Long lived and healthy. Tolerates partial shade.
19.99	Cécile Brünner, Climbing	Cl Pol	8.5	1904. The climbing form of the enduring and popular Cécile Brünner old garden rose. Spreads vigorously, bearing lots of clear pink blossoms. Grows 12 to 20-feet. 42+ petals
19.99	Climbing Pinkie	Cl Pol	8.4	1952. Earth Kind Rose. Nearly thornless. Semi-double, very fragrant pink flowers. Train either as a climber or large, cascading shrub. Difficult to see the foliage when the plant is in full bloom. Grows 8 to 12-feet tall and 6-feet wide. 17 – 25 petals.
19.99	Grüss an Aachen	F	8.3	1909. Great choice for a novice rose grower. Dwarf, compact growth habit, with dark glossy green foliage. Thornless and tolerates partial shade. Sweetly fragrant. Buds open as large pale pink double flowers, fading to creamy white. 25 – 30 petals.
19.99	Hansa	HR	8.3	1905. Red-violet 4-inch blooms, followed by large orange-red hips. Wrinkled, dark green foliage. Grows 5- to 7-feet tall and wide. Strong clove fragrance. 17 - 25 petals.
19.99	Highway 290 Pink Buttons	Min		Texas Found Rose. Grows to 18" tall and 12" wide. Pink semi-double blooms all season long. Makes a fine little border or pot plant.
19.99	Lady Banks White	Ba		1807. Blooms once in the spring on old wood. Prune right after flowering is finished. Grows 10 - 20 feet tall. Small double white blooms, resembling cherry tree blossoms. 17-25 petals. Violets fragrance. Deer don't seem to like it.
19.99	Lady Banks Yellow	Ba	9.1	1824. Blooms once in the spring on old wood. Prune right after flowering is finished. Grows 10 - 20 feet tall. Small double yellow blooms, resembling cherry tree blossoms. 17-25 petals. Violets fragrance. Deer don't seem to like it.
19.99	Maggie	B		Found Rose. Collected by Dr. William C. Welch in Louisiana. Very full carmine flowers, darkening to crimson in cool weather. Vigorous shrub can be grown as a bush, hedge (4-feet tall) or trained as small climber (7-feet tall). 3 to 4-inch blooms. Heady true rose scent.
19.99	Marquise Boccella	HP	8.9	1842. Also known as Marchesa Boccella. Delicate 3½-inch pink blooms sit in clusters of 3 on 10-inch length stems – <i>like plates on poles</i> . 40 – 70 petals. Grows 3- to 4-feet tall and wide. Jade green foliage. Rich, classic rose scent. Tolerates partial shade.

19.99	Valentine	F	6.8	1951. Nearly thornless. Growth habit is slightly open, and foliage is very full, rich green. Long pointed buds open to velvety, semi-double flowers of rich scarlet. Grows 3 to 4-feet tall. Blooms are 3 to 4-inches. 18 petals. Will attract lots of attention.
19.99	Zéphirine Drouhin	CI B	8.8	1868. Great choice for a novice rose grower. Reportedly tolerates partial shade. Thornless canes produce abundant fragrant cerise-pink flowers with a Bourbon rose scent. 25 - 30 petals. Blooms reliably in spring and fall. Grows 8 - 10 feet tall.

A climbing rose in full bloom is a grand cloud of color that will make your heart sing every time you see it!

Place it on a trellis at least a foot away from a garden shed, fence, rain gutter, or other structure so that the climbing rose has a suitable place to grow. Or be creative and train it over a fence, arbor, pergola, tripod, or pillar.

Earth Kind Rose means the shrub has been thoroughly tested by Texas A&M's AgriLIFE Extension service. It is recognized as an environmentally friendly plant for Texas gardens with its outstanding landscape performance and superior pest tolerance. See earthkindroses.tamu.edu for more info.

Rose Growing Tips

Planting Site:

- Plant roses in locations where they receive direct sunlight for eight hours or more each day.
- Choose a site that has good air circulation over their leaves.
Do not plant in an enclosed area like a courtyard or small backyard ringed by an 8-foot fence.
- When planting near a wall, or fence, allow at least 1 foot of space between the rose and the wall or fence.
- When growing a rose in a pot, choose one that is large enough to allow the roots to grow.
A pot that can hold 7 gallons or half whiskey barrel is a good choice.

Bed Preparation:

- Sandy and loam soils
Incorporate 3- to 6-inches of organic matter and sprinkle Micro Life into the hole and backfill.
- Clay soils
Plant in a raised bed that is at least 4- to 6-inches above the surrounding soil.
Incorporate 3-inches of organic matter. Sprinkle Micro Life into the hole and backfill.
- Regardless of soil type, protect roses year-round with a 3 to 4-inch layer of organic mulch (e.g. humus, pine needles, tree leaves).

Watering:

- Avoid overhead watering.
- Water early in the morning.
Do not water in the evening or at night.

Fertilization:

- Roses are heavy feeders. Fertilize them in March, June and lightly in late August.
We highly recommend organic fertilizers.
- For the March and June feedings, use fertilizers in which at least half of the nitrogen is in slow release form.
- For the late light August feeding, use fertilizer in which the nitrogen is readily available.

Disease or Insect Problems:

- Always identify the cause of the problem before applying any treatment.
- If you're unsure what the cause is, bring in a sample to us (in a sealed plastic bag) and we'll be happy to help you determine the problem and recommend a solution.
